

Please leave MY Xm radio alone. I subscribe, and pay my fee, because I choose not to listen to commercials, and to recieve a wider choice of listening options. I am a Professional Truck Driver and listen to the traffic reports frequently. When you listen to brodcast stations, first you have to find them, weed out the commercials and the bad hummor alot of stations have. Most of the time the traffic reporter talks so fast you cannot understand him or her, sometimes being interrupted by a DJ to make some corny joke. Please keep government out. Satlight radio is successful for a reason. Listen to the people.....

sincerly

Richard McAninley
